What We Selected

- Front end of Education Website
- Content
  - Home Page
  - Courses
  - Contact
  - About

Why We Select,

- In the session of preliminaries of web technologies, we learned HTML, CSS and Javascript as Front-End Web Development languages.
- We should use these languages practically in our exercise. therefore we decided to clone a website using these languages which has been chosen from the educational domain.
- hence, we have cloned an online course website front-End UI practically as a group and got many experiences when continuing our progress as a group.

About Us

Malintha Kavinda

We've developed Using,

HTML CSS JS SWIPERJS

External Sites that helped to styling & functions

to add Icons

to embed fonts

to get form responses

How We work together remotely

We've been collaborating with each other using,

GitHub

code hosting platform for version control and collaboration.

Link of the GitHub Repository

https://github.com/KasunJayasanka/PracticalExercise-Front-End.git

Finally,

We hosted cloned website using

Pages

https://kasunjayasanka.github.io/PracticalExercise-Front-End/

Let’s Move on to see How Website Looks Like Quickly
